

ONLINE AUCTIONS WITH RUN CERTIFICATION AUTHORITY OF SERVICE

The Certification Authority of Service (CAs) of the National Council of Notaries implemented by Notartel issues certificates valid for three years which are used for different purposes from those that are typical of the authenticated certificates already in circulation: they allow for secure exchange of documents among different players, e.g. with government agencies and between notaries and also (in the future) with clients.

The CAs is used for signatures in all those cases where a digital signature backed by a Qualified CA is not necessary. It is also used for the issuing of certificates of authentication and encryption.

As regards encryption, the areas of use of the CAs include online real estate auctions, where there is the need to protect the confidentiality of bids until such time as the deadline for their submission, and to protect the principle that only the auctioneer notary may open the offers received. This is done by issuing a nominative certificate called "Cifra" ("Encryption key") that allows the decryption by the receiver of documents previously encrypted with the public key of the certificate.

Notartel has also implemented the Italian Notariat's web platform for managing the auctions of social security institutions, judicial auctions and bankruptcy auctions.

Società informatica
del notariato italiano

notartel

Founded in 1997, Notartel is a company owned by the National Council of Notaries and the Cassa Nazionale. We implement and manage computerised and online services for Italian notaries. We connect all Italian notarial offices through the Unified Notarial Network (R.U.N.), a private web platform created by the Notariat at its own expense that provides services for communications with the public service and thus indirectly with the public. Our task is to implement the policies set out by the IT Sector of the National Council. Our operational aim is to integrate the internal services within the notary's office, created in-house or by third parties, with those of the Public Administration and private parties using a single Notarial computer system. Since 2002 we have managed the issuing of digital signatures and smart cards as well as certified electronic mail for Italian notaries on behalf of the National Council of Notaries. We have been certified ISO 27001: 2013, ISO 9001: 2000 and Regulation EU No 910/2014 (eIDAS). We are registered in the list of accredited AgID Conservators and in the Register of online sale Managers by Ministry of Justice.
