NOTBOX

Notbox is the service born in June 2018 to simply and safely share, communicate and collaborate.

It collects all files in a single cloud space managed by Notartel to access them anytime, anywhere. It synchronizes data with other fixed or mobile devices so you have everything at your fingertips in one interface.

It is simple, with an intuitive graphical interface, accessibility from any device and a text editor; it allows you to work on the move with data available at any time and it is safe, thanks to high security and privacy standards, in line with the new EU Regulation.

Notbox Studio is the cloud for notary's offices shared with up to 5 collaborators to whom the notary can customize access and functions.

Founded in 1997, Notartel is a company owned by the National Council of Notaries and the Cassa Nazionale. We implement and manage computerised and online services for Italian notaries. We connect all Italian notarial offices through the Unified Notarial Network (R.U.N.), a private web platform created by the Notariat at its own expense that provides services for communications with the public service and thus indirectly with the public. Our task is to implement the policies set out by the IT Sector of the National Council. Our operational aim is to integrate the internal services within the notary's office, created in-house or by third parties, with those of the Public Administration and private parties using a single Notarial computer system. Since 2002 we have managed the issuing of digital signatures and smart cards as well as certified electronic mail for Italian notaries on behalf of the National Council of Notaries. We have been certified ISO 27001: 2013, ISO 9001: 2000 and Regulation EU No 910/2014 (eIDAS). We are registered in the list of accredited AgID Conservators and in the Register of online sale Managers by Ministry of Justice.
