

Società informatica  
del notariato italiano

## e-Sign

e-Sign, launched in 2010, is the unique signature software that can interface both with certificates issued by the Qualified Digital Signature service and those issued by the National Council's CAs Certification Authority of service.

This software incorporates the AgID's technical rules for cryptographic algorithms and the methods of control of encryption keys, as well as having advanced specifications for use in the notarial environment, ensuring the highest level of safety and reliability of the signed documents.

The software is able to operate automatically in signature and deciphering operations.

Founded in 1997, Notartel is a company owned by the National Council of Notaries and the Cassa Nazionale. We implement and manage computerised and online services for Italian notaries. We connect all Italian notarial offices through the Unified Notarial Network (R.U.N.), a private web platform created by the Notariat at its own expense that provides services for communications with the public service and thus indirectly with the public. Our task is to implement the policies set out by the IT Sector of the National Council. Our operational aim is to integrate the internal services within the notary's office, created in-house or by third parties, with those of the Public Administration and private parties using a single Notarial computer system. Since 2002 we have managed the issuing of digital signatures and smart cards as well as certified electronic mail for Italian notaries on behalf of the National Council of Notaries. We have been certified ISO 27001: 2013, ISO 9001: 2000 and Regulation EU No 910/2014 (eIDAS). We are registered in the list of accredited AgID Conservators and in the Register of online sale Managers by Ministry of Justice.
